

INFORMATION SYSTEMS

Providing an efficient, seamless virtual work environment

VISION

To accelerate progress toward mission goals, our business and operations processes will be aggressively streamlined for efficiency.

In addition, the information systems that support those processes will be user-centric and integrated, to facilitate decisions by delivering data and actionable, integrated business information where and when it is needed.

GOALS

- ▶ Provide a high-performance information technology infrastructure
- ▶ Implement user-centric information systems that accelerate processes
- ▶ Facilitate decision making

RESULTS

- ▶ Virtual work environments
- ▶ 24-hour information access
- ▶ Simple, easy-to-use business system tools
- ▶ Multi-year financial planning
- ▶ Simplified and streamlined work processes

LEADERSHIP

Stuart D. Hannay, Chief Information Officer, Computing and Information Systems,
Argonne National Laboratory
