MODERN FACILITIES

Creating a productive physical environment for discovery and innovation

VISION

A staged renovation and building program will create contemporary physical infrastructure that enhances research productivity and collaboration.

A revitalized campus will be welcoming and sustainable, and will integrate multiple disciplines and feature flexible space and a high-performance IT and communications infrastructure with a reduced legacy footprint.

GOALS

- ▶ Deliver flexible facilities that foster collaboration and mission excellence
- ▶ Provide a safe, sustainable work environment

RESULTS

- ▶ State-of-the-art facilities
- ▶ Aesthetic, visually pleasing pedestrian campus
- ▶ Sustainable, energy-efficient buildings
- ▶ Decommissioned and/or demolished legacy buildings
- ▶ Modular laboratories and satellite work areas
- ▶ Open work spaces and collaborative environments

LEADERSHIP

Gail Stine, Division Director, Facilities Management and Services, Argonne National Laboratory
