

DI-JIA LIU

Argonne National Laboratory
Chemical Sciences & Engineering Division, 9700 S. Cass Ave. Argonne, IL 60439
(630) 252-4511 Voice, (630) 854-4697 Cell phone
E-mail: djliu@anl.gov

EDUCATION

Postdoctoral Fellow, The University of California at Berkeley. 1988-1990
Ph. D in Physical Chemistry, The University of Chicago, 1987
B. Sc. in Chemistry, Peking University, 1982

EMPLOYMENT HISTORY

Senior Chemist: Argonne National Laboratory, 2016 – present.
Chemist, Argonne National Laboratory, 2002- 2016
Senior Principal Scientist, Honeywell International Inc., 2000-2002.
Principal Scientist, Honeywell (formerly AlliedSignal Inc.), 1996-2000.
Project Leader/Senior Research Chemist, AlliedSignal Inc., 1994-1996.
Research Chemist, AlliedSignal Inc., 1990-1994.

AWARDS & RECOGNITIONS

- *R&D 100 Award* by R&D magazine, 2016
- *DOE Hydrogen Program Team Award* by DOE, Office of Energy Efficiency & Renewable Energy as a member of Hydrogen Sorption Center of Excellence, 2010.
- *Outstanding Mentor Award* by Office of Science, U. S. Department of Energy, 2010.
- *Argonne National Laboratory Pacesetter Award* for investigation of solid oxide fuel cell using microfocused synchrotron X-ray diffraction & radiographic method, 2006.
- *Honeywell Aerospace Technology Achievement Award* for developing microturbine emission control device, 2001
- *Honeywell Laboratory Special Recognition Award* for leadership in implementing 6-Sigma process for new technology development, 2001
- *Honeywell Power Systems Achievement Award* for developing microturbine power generator post emission treatment catalyst, 2000
- *USA Today Quality Cup Award* – a national recognition for achieving major technology and manufacturing quality improvement through 6-Sigma process in record time, 2000
- *AlliedSignal Corporate Technical Achievement Award* for developing the state-of-the-art aircraft ozone converter for Boeing 777 commercial aircraft, 1998
- *Certification of AlliedSignal 6-Sigma Black Belt* for implementing manufacturing process improvement and cost saving, 1997
- *AlliedSignal Special Technical Recognition Award* for developing scanning X-ray microscopic method for polymer characterization, 1995
- *Elizabeth R. Norton Prize for Excellence in Graduate Research*, The University of Chicago, 1986

WORK EXPERIENCES

Experience at Argonne National Laboratory

- **Project Team Leader** of developing PGM-free electrocatalyst for PEM electrolyzer, funded by DOE Office of Fuel Cell Technologies. (2017-)
- **Project Team Leader** of developing ultralow Pt fuel cell catalyst, funded by DOE Office of Fuel Cell Technologies. (2017-)
- **Project Team Leader** of a grant on exploring complex hydride based hydrogen storage material (**\$1 million**, 3 years), funded by DOE Office of Fuel Cell Technologies. (2016-)
- **Co PI** of a TAMU led project in developing MOF-based sorption materials for hydrogen storage (2015 -2016)
- **Lead PI** of a new research grant on exploring metal-organic frameworks as precursors for next-generation non-precious metal electrode catalyst, funded by DOE Office of Fuel Cell Technologies. (2013-)
- **Lead PI** and **Team Leader** of an Argonne-U. of Chicago team in developing novel porous polymer based hydrogen storage material (**\$2 million**, 5 years), funded by DOE Office of Fuel Cell Technologies. (2007-2012)
- **Lead PI** in developing aligned carbon nanotube for fuel cell electrode support (**\$1 million**, two-year), funded by DOE Office of Fuel Cell Technologies. (2006-2008)
- **PI** in developing low-cost diesel and logistic fuel reforming catalysts for on-board hydrogen production and synchrotron X-ray technique for characterizing solid oxide fuel cell, funded by DOE Office of Fossil Energy. (2002-2006)
- **Lead PI** in developing porous polymer network material for on-board methane storage. (LDRD-Argonne Director Competitive, 2015-)
- **Lead PI** in developing next-generation nano-network catalyst and electrocatalyst for fuel cell and biofuel applications. (LDRD-Argonne Director Competitive, 2014-)
- **Co-PI** in developing new cathode catalyst and characterization method for lithium-air battery application, (Grand Challenge Initiative-Argonne, 2010-2012).
- **Lead PI** in developing metal-organic framework materials for carbon dioxide sequestration, conversion and electrocatalysis application (LDRD-Argonne Director Competitive, 2009-2011)
- **Co-PI** of “Soft Catalysis” team, Materials for Energy Initiative, (LDRD-Argonne Strategic, 2011-2013)
- **Co-PI** in developing a time-resolved technique of studying catalytic behavior in picosecond domain using a laser/synchrotron X-ray technique, (LDRD-Argonne Strategic 2010-2012)
- **Lead PI** in developing carbon nanotube based electrode catalyst for PEM fuel cell and direct ethanol fuel cell application, (LDRD-Argonne Strategic/Director Competitive 2007, 2007-2009)
- **Lead PI** in developing organic hydride as hydrogen storage material (LDRD-Argonne Strategic, 2004-2005)
- **Lead PI** in developing porous organic polymer for hydrogen storage application (LDRD-Argonne Director Competitive, 2004-2006)

Selected Experience at Honeywell/AlliedSignal

- **PI** and **Team Leader** of several multimillion dollar internal and DoE funded PEM fuel cell programs.

- **Lead Scientist** of an award winning, the state-of-the-art ozone catalytic converter for Boeing 777 aircraft environmental control system that generated \$36 million business for AlliedSignal.
- **PI and Team Leader** in developing an emission control device for microturbine power generator for Honeywell Distributed Power business.
- **PI and Team Leader** in developing NO_x reduction catalyst for automotive emission control application to support customers such as Delphi Automotive Catalysis Com. (formerly AlliedSignal Environmental Catalysis Com.)
- **PI and Team Leader** in developing in-situ, real time synchrotron X-ray absorption spectroscopy for catalyst structure/property relationship study and a synchrotron X-ray scanning microscopy for characterizing polymer blend material.
- **Team Leader** in implementing 6-Sigma process at AlliedSignal Polymer and Electronic Material manufacturing facilities, achieved combined annual cost saving of \$1.5 million.
- **Industrial Six-Sigma Black Belt and Trainer**, in charge of training, mentoring and certifying Green Belts in applying statistical design principles in R&D organization.

GRADUATE SCHOOL & POSTDOC TRAININGS

- High resolution VUV-XUV spectroscopic and dynamic study of the molecular beam using non-linear frequency mixing (postdoc study under Y. T. Lee, Nobel Laureate 1986).
- High resolution laser spectroscopic study of molecular ions using infrared tunable diode laser and different frequency mixing dye laser (graduate study under T. Oka, F.R.S.).

SELECTED LIST OF INDUSTRIAL & INSTITUTIONAL TRAININGS

- *Managing New Product Development* – Kellogg School of Business, Northwestern University.
- *Honeywell Leadership Training*.
- *Honeywell (AlliedSignal) 6-Sigma Black Belt Training*.
- Others include *Project Management, Career Development, 2-day MBA in Economic Analysis, Reactor Engineering Design, ASPEN Training, etc.*

SYNERGISTIC ACTIVITIES

Senior Fellow at Institute of Molecular Engineering of University of Chicago, 2018 -
Graduate Faculty Scholar Member of Northern Illinois University 2013-
Operating Agent of Annex 31 on behalf of DOE for Advanced Fuel Cell Technology Collaboration Programmne (AFC TCP) under the International Energy Agency (IEA) 2013-
Director (2008), **President** (1999) and **Program Chair** (1998) of Chicago Catalysis Club, a local branch of North American Catalysis Society.

Member of American Association for the Advancement of Science

Member of the Electrochemical Society

Member of American Chemical Society.

Member of North American Catalysis Society.

Journal Reviewer of *Nature, Nature Comm., Ad. Mat., J. of Am. Chem. Soc., Angew. Chem. Int. Ed., Chem. Comm., Electro. Comm., Energy & Environ Sci., Appl. Cat., ChemSusChem, J Phys. Chem., J. Chem. Phys., J. Electro. Chem. Soc., and many more.*

Supervised 8 postdocs and nearly 20 guest graduate students, coop student researchers, undergraduate interns and Faculty and Student Research Team at Argonne.

Industrial Collaboration: General Motor, Nissan, General Electric, United Technologies, Air Products, Cummins, Honeywell, GTI. etc.

National Lab Collaboration: LANL, NREL, PNNL, ORNL, SNL, LBNL

University Collaboration: U Chicago, Northwestern U., Northern Ill U, U of Illinois, Texas A&M, U North Carolina, Southern Illinois U., etc.

JOURNAL PUBLICATIONS & PATENTS

Published **over 100** scientific papers and received **22** granted US patents in the fields of fuel cell, nanomaterials, electrocatalysis, hydrogen storage and production, battery, environmental catalysis, advanced material characterization and physical chemistry in general.

2018

1. “Ultralow-loading platinum-cobalt fuel cell catalysts derived from imidazolate frameworks” Lina Chong, Jianguo Wen, Joseph Kubal, Fatih G. Sen, Jianxin Zou, Jeffery Greeley, Maria Chan, Heather Barkholtz, Wenjiang Ding, Di-Jia Liu, *Science* **362**, 1276–1281 (2018), DOI:10.1126/science.aau0630
2. “Spatiotemporal Operando X-ray Diffraction Study on Li–Air Battery”, Di-Jia Liu and Jiang-Lan Shui, Book chapter in *Metal–Air Batteries: Fundamentals and Applications*, First Edition. Edited by Xin-bo Zhang. **2018** Wiley-VCH Verlag GmbH & Co. KGaA.
3. “An assessment of strategies for the development of solid-state adsorbents for vehicular hydrogen storage” M. D. Allendorf, Z. Hulvey, T. Gennett, A. Ahmed, T. Autrey, J. Camp, E. S. Cho, H. Furukawa, M. Haranczyk, M. Head-Gordon, S. Jeong, A. Karkamkar, Di-Jia Liu, J. R. Long, K. R. Meihaus, I. H. Nayyar, R. Nazarov, D. J. Siegel, V. Stavila, J. J. Urban, S. P. Veccham and B. C. Wood, *Energy Environ. Sci.* 2018, **11**, 2784--2812
4. “Hydrogen storage and fuel cells”, Di-Jia Liu, AIP Conference Proceedings, **1924**, 020008 (2018)

2017

5. “High-performance oxygen reduction catalysts in both alkaline and acidic fuel cells based on pre-treating carbon material and iron precursor” Ping Song, Heather Barkholtz, Ying Wang, Weilin Xu, Di-Jia Liu, Lin Zhuang, *Science Bulletin* 62(23) · October 2017
6. "High-Performance Platinum Single-Atom Electrocatalyst for Oxygen Reduction Reaction" by Jing Liu, Menggai Jiao, Lanlu Lu, Heather Barkholtz, Yuping Li, Ying Wang, Luhua Jiang, Zhijian Wu, Di-Jia Liu, Lin Zhuang, Chao Ma, Jie Zeng, Bingsen Zhang, Dangsheng Su, Ping Song, Wei Xing, Weilin Xu, Ying Wang, Zheng Jiang, and Gongquan Sun, *Nature Communications*, | 8:15938 | DOI: 10.1038/ncomms15938.
7. “MO-Co@N-Doped Carbon (M = Zn or Co): Vital Roles of Inactive Zn and Highly Efficient Activity toward Oxygen Reduction/Evolution Reactions for Rechargeable Zn–Air Battery” Biaohua Chen, Xiaobo He, Fengxiang Yin,* Hao Wang, Di-Jia Liu, Ruixing Shi, Jinnan Chen, and Hongwei Yin, *Adv. Funct. Mater.* **2017**, 1700795
8. “Towards highly efficient electrocatalyst for Li–O₂ batteries using biphasic N-doping cobalt@graphene multiple-capsule heterostructures,” Guoqiang Tan, Lina Chong, Rachid Amine, Jun Lu, Cong Liu, Yifei Yuan, Jianguo Wen, Kun He, Xuanxuan Bi, Yuanyuan Guo, Hsien-Hau Wang, Reza Shahbazian-Yassar, Said Al Hallaj, Dean J. Miller, Dijia

Liu, and Khalil Amine, *Nano Lett.*, 2017, 17 (5), pp 2959–2966, DOI: 10.1021/acs.nanolett.7b00207

9. “Insights into the Distinct Lithiation/Sodiation of Porous Cobalt Oxide by in Operando Synchrotron X-ray Techniques and ab initio Molecular Dynamics Simulations” Xu, Gui-Liang; Sheng, Tian; Chong, Lina; Ma, Tianyuan; Sun, Chengjun; Zuo, Xiaobing; Liu, Di-Jia; Ren, Yang; Zhang, Xiaoyi; Liu, Yuzi; Heald, Steve; Sun, Shi-Gang; Chen, Zonghai; Amine, Khalil, *Nano Lett.*, **2017**, 17 (2), pp 953–962
10. “ZIF-67 incorporated with carbon derived from pomelo peels: A highly efficient bifunctional catalyst for oxygen reduction/evolution reactions” Hao Wang, Feng-Xiang Yin, Biao-Hua Chen, Xiao-Bo He, Peng-Liang Lv, Cai-Yun Ye, Di-Jia Liu, *Applied Catalysis B: Environmental* **205** (2017) 55–67
11. (Invited Contribution) “Advancements in rationally designed PGM-free fuel cell catalysts derived from metal–organic frameworks” Heather M. Barkholtz and Di-Jia Liu, *Materials Horizons*, **2017**, 4, 20—37, DOI: 10.1039/c6mh00344c

2016

12. “Wrapped by graphene”: An efficient way to achieve high capacity, reversible hydrogen storage through nanoencapsulated hydride, J. Zou, L. Chong, D.-J. Liu, et. al. *Science*, **2016**, 351 (6278), 1223, Special issue.
13. “Lithium Assisted “Dissolution–Alloying” Synthesis of Nanoalloys from Individual Bulk Metals”, Heather M. Barkholtz, James R. Gallagher, Tao Li, Yuzi Liu, Rachel Koritala, Randall E. Winans, Jeffrey T. Miller, Di-Jia Liu, Tao Xu, *Chemistry of Materials*, **2016**, 28 (7), pp 2267–2277, DOI: 10.1021/acs.chemmater.6b00216.
14. (Invited Contribution) “Investigation of Oxygen Reduction Activity of Catalysts Derived from Co and Co/Zn Methyl-Imidazolate Frameworks in Proton Exchange Membrane Fuel Cells” Lina Chong, Gabriel A. Goenaga, Kia Williams, Heather M. Barkholtz, Lauren R. Grabstanowicz, Jeremy A. Brooksbank, Alex B. Papandrew, Thomas A. Zawodzinski Jr., Jianxin Zou, Shengqian Ma, and Di-Jia Liu, *ChemElectroChem*, **2016**, 3, 1 – 6, DOI: 10.1002/celec.201600163
15. (Invited Contribution) “Non-Precious Metal Catalysts Prepared By Zeolitic Imidazolate Frameworks: The Ligand Influence to Morphology and Performance” H. M. Barkholtz, L. Chong, Z. B. Kaiser, D. J. Liu, *FUEL CELLS* 16, **2016**, No. 4, 428–433 DOI: 10.1002/fuce.201500164
16. “Heterogeneous silicon mesostructures for lipid-supported bioelectric interfaces” Yuanwen Jiang, João L. Carvalho-de-Souza, Raymond C. S. Wong, Zhiqiang Luo, Dieter Isheim, Xiaobing Zuo, Alan W. Nicholls, Il Woong Jung, Di-Jia Liu, Yucai Wang, Vincent De Andrade, Xianghui Xiao, Luizetta Navrazhnykh, David N. Seidman, Francisco Bezanilla, Bozhi Tian, *Nature Materials* | VOL 15 | September 2016 | 1023
17. (Invited Contribution) “Enhanced Performance of non-PGM Catalysts in Air Operated PEM-Fuel Cells” Heather M. Barkholtz, Lina Chong, Zachary B. Kaiser, Tao Xu, and Di-Jia Liu, *International Journal of Hydrogen Energy*, **2016**, 41 pp. 22598-22604 DOI:10.1016/j.ijhydene.2016.08.193.

2015

18. “High-efficiency non-precious metal catalyst containing metal-organic framework precursor inside of carbon nano-network” Jianglan Shui, Chen Chen, Lauren R. Grabstanowicz, Dan Zhao and Di-Jia Liu*, *Proceedings of National Academy of Sciences*, **2015**, vol. 112, no. 34, 10629–10634 doi/10.1073/pnas.1507159112
19. “NaBH₄ in “Graphene Wrapper”: Significantly Enhanced Hydrogen Storage Capacity and Regenerability through Nano-encapsulation”, Lina Chong, Xiaoqin Zeng, Wenjiang Ding, Di-Jia Liu and Jianxin Zou, *Advanced Materials*, **2015**, 27, 5070–5074, DOI: 10.1002/adma.201500831
20. (Invited Contribution) “Highly Active Non-PGM Catalysts Prepared from Metal-Organic Frameworks”, Heather M. Barkholtz, Lina Chong, Zachary B. Kaiser, Tao Xu, and Di-Jia Liu*, Special issue on Polymer Electrolyte Membrane Fuel Cell in *Catalysis* **2015**, 5, 955-965; doi:10.3390/catal5020955
21. “Catalytic Reaction on FeN₄/C Site of Nitrogen Functionalized Carbon Nanotubes as Cathode Catalyst for Hydrogen Fuel Cells” Feng Gao, Guang-Lin Zhao, Zhou Wang, Diola Bagayoko, Di-Jia Liu, *Catalysis Communications* 62 (2015) 79–82, doi:10.1016/j.catcom.2015.01.015

2014

22. “Highly Efficient Non-Precious Metal Electrocatalysts Prepared from One-Pot Synthesized Zeolitic Imidazolate Frameworks (ZIFs)” Dan Zhao, Jiang-Lan Shui, Lauren R. Grabstanowicz, Chen Chen, Sean M. Commet, Tao Xu, Jun Lu, and Di-Jia Liu*, *Advanced Materials*, **2014**, 26, 1093–1097 DOI: 10.1002/adma.201304238. (Frontpiece article)
23. “*In Operando* spatiotemporal study of Li₂O₂ grain growth and distribution inside of operating Li-O₂ batteries” Jiang-Lan Shui, John S. Okasinski, Chen Chen, Jonathan D. Almer and Di-Jia Liu*, *ChemSusChem* **2014**, 7, 543 – 548, DOI: 10.1002/cssc.
24. “Holistic View on Chemical Processes in Li-O₂ Battery from *Operando* Spatiotemporal Study” J. Shui, J. Okasinski, P. Kenesei, J. Almer and Di-Jia Liu*, *ECS Transaction* 58 (12) 3-14 (2014)

2013

25. “Highly-Active and “Support-free” Oxygen Reduction Catalyst Prepared from Ultrahigh Surface Area Porous Polyporphyrin” Shengwen Yuan, Jiang-Lan Shui, Lauren Grabstanowicz, Chen Chen, Sean Commet, Briana Repogle, Tao Xu, Luping Yu and Di-Jia Liu*, *Angew. Chem. Int. Ed.*, **2013**, 52(32), 8349–8353 DOI: 10.1002/anie.201302924
26. “Reversibility of anodic lithium in non-aqueous Li-O₂ batteries” Jiang-Lan Shui, John S. Okasinski, Peter Kenesei, Howard A. Dobbs, Dan Zhao, Jonathan D. Almer, and Di-Jia Liu*, *Nature Comm.* **2013** 4, 2255, DOI: 10.1038/ncomms3255
27. “Degradation and revival of Li-O₂ battery cathode” Jiang-Lan Shui, Hsien-Hau Wang, and Di-Jia Liu*, *Electrochem Comm.* **2013** doi: 10.1016/j.elecom.2013.05.020
28. (Invited article in special issue Oka Festschrift) “Photodissociation Structural Dynamics of Triruthenium Dodecacarbonyl Investigated by X-Ray Transient Absorption Spectroscopy” Michael R. Harpham, Andrew B. Stickrath, Xiaoyi Zhang, Jier Huang, Michael W. Mara,

Lin X. Chen, and Di-Jia Liu*, *J. Phys. Chem. A.* **2013** 117 (39), pp 9807–9813, DOI: 10.1021/jp312663q

29. “A Facile Oxidative Conversion of TiH₂ to High Concentration Ti³⁺-Self-Doped Rutile TiO₂ with Visible-Light Photoactivity” Lauren R. Grabstanowicz, Shaomin Gao, Tao Li, Robert M. Rickard, Tijana Rajh, Di-Jia Liu, and Tao Xu, *Inorg. Chem.* **2013** 52(7): 3884-90 DOI: 10.1021/ic3026182
30. “Performance Improvement of Fuel Cells using Platinum Functionalized Aligned Carbon Nanotubes”, Yuan Yuan, Joshua Smith, Gabriel Goenaga, Di-Jia Liu, Bo Zhou, and Jingbo Liu, *J. of Experimental Nanoscience*, **2013**, Vol. 8, No.6 , 633-643, DOI: 10.1080/17458080.2011.608728
31. “Porous Organic Polymers Containing Carborane for Hydrogen Storage”, Shengwen Yuan, Desiree White, Alex Mason, and Di-Jia Liu*, *Int. J. of Energy Research.* **2013**, 37 (7) 732-740. DOI: 10.1002/er.1886.
32. “New Approach to High-Efficiency Non-PGM Catalysts Using Rationally Designed Porous Organic Polymers” S. Yuan, G. Goenaga, L. Grabstanowicz, J. Shui, C. Chen, S. Commet, B. Repogle and Di-Jia Liu*, *ECS Transaction*, **2013** 58(1): 1671-1680; doi:10.1149/05801.1671ecst
33. “Understanding of Electrolyte Stability and Its Impact to Lifespan of Li-O₂ Battery” Jianglan Shui, John Okasinski, Dan Zhao, Jon Almer and Di-Jia Liu*, *ECS Transactions*, 50 (25) 37-45 (**2013**)

2012

34. Fe/N/C composite in Li–O₂ battery: Studies of the catalytic structure and activity towards oxygen evolution reaction, Jiang–Lan Shui, Naba K. Karan, Mahalingam Balasubramanian, Shu–You Li and Di-Jia Liu*, *J. Am. Chem. Soc.* **2012**, 134 (40), 16654–16661 doi:10.1021/ja3042993
35. “Micro-focused X-ray study on precipitate formation in non-aqueous Li-O₂ batteries” Jiang-Lan Shui, John S. Okasinski, Dan Zhao, Jonathan D. Almer and Di-Jia Liu*, *ChemSusChem*, **2012**, 5, 2421 – 2426, DOI: 10.1002/cssc.201200555
36. “Iron imidazolate framework as precursor for electrocatalysts in polymer electrolyte membrane fuel cells”, Dan Zhao, Jiang-Lan Shui, Chen Chen, Xinqi Chen, Briana M. Repogle, Dapeng Wang and Di-Jia Liu*, *Chem. Sci.*, **2012**, 3 (11), 3200 – 3205, DOI: 10.1039/c2sc20657a
37. “What Happens When a Photon Strikes (Fulvalene)tetracarbonyl-diruthenium? An Answer by X-ray Transient Absorption and Picosecond IR Spectroscopy”, M. R. Harpham, S. C. Nguyen, Z. Hou, J. C. Grossman, C. B. Harris, M. W. Mara, A. B. Stickrath, Y. Kanai, A. M. Kolpak, D. Lee, D-J Liu, J. P. Lomont, K. Moth-Poulsen, N. Vinokurov, L. X. Chen, and K. Peter C. Vollhardt, *Angew. Chem. Int. Ed.* **2012**, 51, 7692 –7696
38. “Tunability of Band Gaps in Metal-Organic Frameworks”, Chi-Kai Lin, Dan Zhao, Wen-Yang Gao, Zhenzhen Yang, Jingyun Ye, Tao Xu, Qingfeng Ge, Shengqian Ma, and Di-Jia Liu*, DOI: 10.1021/ic301189m, *Inorg. Chem.* **2012**, 51, 9039–9044

39. “Improving Hydrogen Adsorption Enthalpy through Coordinatively Unsaturated Cobalt in Porous Polymer”, S. Yuan, D. White, A. Mason, B. Repogle, M. Ferrandon, L. Yu, and Di-Jia Liu*, *Macromolecular Rapid Communication*. **2012**, 33, 407–413, DOI = 10.1002/marc.201100797
40. “Nanoporous Porphyrin Polymers for Gas Storage and Separation”, Zhuo Wang, Shengwen Yuan, Alex Mason, Briana Repogle, Di-Jia Liu*, and Luping Yu, *Macromolecules* **2012**, 45 (18), pp 7413–7419
41. “Direct Synthesis of Bimetallic Pd₃Ag Nanoalloys from Bulk Pd₃Ag Alloy”, C-K Lin, Y-G Lin, T. Wu, H. M. Barkholtz, Q. Lin, H. Wei, D. L. Brewe, J. T. Miller, D-J Liu, Y. Ren, Y. Ito, and T. Xu, *Inorg. Chem.* **2012**, 51, 13281–13288
42. “Low-cost, high-efficiency non-PGM cathode catalysts using MOFs as precursors”, Dan Zhao, Jianglan Shui, Chen Chen, Sean Comment, Briana Repogle and Di-Jia Liu*, *ECS Transaction* **2012**, 50(2) 1861.
43. “Visible-Light Photocatalytic SiO₂/TiO₂-xC_x/C Nanoporous Composites Using TiCl₄ as Precursor for TiO₂ and Polyhydroxyl Tannin as Carbon Source”, Juzheng Zhang, Lauren R. Grabstanowicz, Shanmin Gao, Narayan S. Hosmane, Baibiao Huang, Ying Dai, Di-Jia Liu and Tao Xu, *Catalysis Science & Technology* **2012**, 2, 390-399 DOI:10.1039/C1CY00403D

2011

44. “Cobalt Imidazolate Framework as Precursor for Oxygen Reduction Reaction Electrocatalyst”, Shengqian Ma, Gabriel Goenaga, Ann Call and Di-Jia Liu*, *Chemistry: A European Journal*, (**2011**) 17, 2063 – 2067.
45. “Solid Dye-Sensitized Solar Cells Prepared through a Counter Strategy for Filling of Solid Hole Transporter”, Zhenzhen Yang, Kate C. Power, Di-Jia Liu, Yang Ren, and Tao Xu, *Journal of Renewable and Sustainable Energy*, 3, 063101 (**2011**), doi:10.1063/1.3658435
46. “New Approaches to Non-PGM Catalysts through Rational Design”, Di-Jia Liu*, Gabriel Goenaga, Shengqian Ma, Shengwen Yuan, Jianglan Shui, *ECS Transactions* **2011**, 30, 97-104
47. “Platinum Decorated Aligned Carbon Nanotubes: Electrocatalyst for Improved Performance of Proton Exchange Membrane Fuel Cells”, Yuan Yuan, Joshua A. Smith, Gabriel Goenaga, Di-Jia Liu*, Zhiping Luo, and Jingbo Liu, *Journal of Power Sources* 196 (**2011**) 6160–6167

2010

48. Microporous Polyphenylenes with Tunable Pore Size for Hydrogen Storage, Shengwen Yuan, Brian Dorney, Desiree White, Scott Kirklin, Peter Zapol, Luping Yu and Di-Jia Liu*, *Chem. Comm.* **2010**, 46, 4547 - 4549
49. Nanoporous Polyporphyrin as Adsorbent for Hydrogen Storage, Jiangbin Xia, Shengwen Yuan, Zhuo Wang, Scott Kirklin, Brian Dorney, Di-Jia Liu* and Luping Yu, *Macromolecules*. 43, 3325–3330 (**2010**) DOI: 10.1021/ma100026f

50. Characterization of Cr Poisoning in a Solid Oxide Fuel Cell Cathode Using a High-Energy X-ray Microbeam, Di-Jia Liu*, Jonathan Almer, and Terry Cruse, *J. Electrochem. Soc.* 157 (5) B744-B750, (2010)
51. Polymer electrolyte fuel cell with vertically aligned carbon nanotubes as the electrocatalyst support, Junbing Yang, Gabriel Goenaga, Ann Call and Di-Jia Liu*, *Electrochemical and Solid-State Letters*, 13 (6) B55-B57, (2010)
52. Excited State Molecular Structures Captured by X-ray Transient Absorption Spectroscopy: A Decade and Beyond, Lin Chen, Xiaoyi Zhang, Jenny Lockard, Andrew Stickrath, Klaus Attenkofer, Guy Jennings and Di-Jia Liu, *Acta Crystallographica A* 66, 240–251, (2010).
53. New Approaches to Non-PGM Electrocatalysts Using Porous Framework Materials, Gabriel Goenaga, Shengqian Ma, Shengwen Yuan, and Di-Jia Liu*, *ECS Transactions* 33 (1) 579-586 (2010)

2009

54. Phase and strain distributions associated with reactive contaminants inside of a solid oxide fuel cell, Di-Jia Liu* and Jonathan Almer, *Applied Physics Letters*, 94, 224106 (2009) DOI: 10.1063/1.3148362
55. A Nanotubular Metal-Organic Framework with Permanent Porosity: Structure Analysis and Gas Sorption Studies, Shengqian Ma, Jason M. Simmons, Jian-Rong Li, Daqiang Yuan, Wei Weng, Di-Jia Liu, and Hong-Cai Zhou, *Chem. Comm.* (2009) 4049-4051
56. Revealing Structural Dynamics in Catalytic Reactions Using Ultrafast Transient X-ray Absorption Spectroscopy, Lin X. Chen and Di-Jia Liu*, *Synchrotron Radiation News*, 22(20) 17-22 (2009)
57. Microporous Polymers Containing Stereo-contorted Cores, Shengwen Yuan, Scott Kirklin, Brian Dorney, Di-Jia Liu* and Luping Yu, *Macromolecules* (2009), 42(5), 1554-1559
58. Investigation of Phase & Strain Distributions Inside of Solid Oxide Fuel Cells, Di-Jia Liu* and J. Almer, *ECS Transactions*, 16 (51) 107-113 (2009)
59. Catalytic FeN_x Sites in Carbon Nanotubes, Alexey Titov, Peter Zapol, Petr Kral, Di-Jia Liu, and Larry Curtiss, *J. Phys. Chem. C.* 113, 21629–21634 (2009)

2008 & Before

60. Aligned carbon nanotubes with built-in FeN₄ active site for electrocatalytic reduction of oxygen, Junbing Yang, Di-Jia Liu*, Nancy Kariuki and Lin X. Chen, *Chem. Comm.* 3 (2008) 329 – 331
61. Performance Improvement In PEMFC Using Aligned Carbon Nanotubes as Electrode Catalyst Support, Di-Jia Liu*, J. Yang, N. Kariuki, G. Goenaga, A. Call, and D. Myers, *ECS Transactions*, 16 (2) 1123-1129 (2008)
62. Catalysis by Single Ions in a Host Lattice, Michael Krumpelt, Cecil Rossignol, Di-Jia Liu, *Catal. Lett.* (2008) 124:13–17
63. Ultrafast Structural Dynamics of Photoactive Metal Complexes in Solar Hydrogen Generation, Lin X. Chen, Di-Jia Liu, Xiaoyi Zhang, Erik C. Wasinger, Klaus Attenkofer, Guy Jennings, *Proc. of SPIE*, Vol. 6650, 665001-1, (2007)

64. 3-D structured Membrane Electrode Assembly with Patterned Aligned Carbon Nanotubes as Electrode Materials. Junbing Yang and Di-Jia Liu*, *Carbon* 45 (2007) 2843–2854.
65. Investigation of Aligned Carbon Nanotubes as a Novel Catalytic Electrodes for PEM Fuel Cells, Di-Jia Liu, Junbing Yang and David Gosztola, *ECS Transc.* 5(1) 147-154, (2007).
66. Chromium Reactions and Transport in Solid Oxide Fuel Cells, T.A. Cruse, B.J. Ingram, D.-J. Liu and M. Krumpelt, *ECS Transc* 5 (1) 335-346 (2007).
67. Critical Issues in Catalytic Diesel Reforming for Solid Oxide Fuel Cells, Di-Jia Liu*, M. Krumpelt, H. T. Chien and S. H. Sheen, *Journal of Materials Engineering and Performance*, Vol 15(4) 442-444 2006
68. Activity and Structure of Perovskites As Diesel Reforming Catalysts For Solid Oxide Fuel Cell, Di-Jia Liu* and M. Krumpelt, *International Journal of Applied Ceramic Technology*, Vol. 2, No 4, Page 301-307, (2005).
69. Activity and Structure of Perovskites As Diesel Reforming Catalysts For Solid Oxide Fuel Cell, Di-Jia Liu* and Michael Krumpelt, *Ceramic Engineering and Science Proceedings (CESP)*, Vol. 26(4) 317-324 *Advances in Solid Oxide Fuel Cells*.
70. Low cost autothermal diesel reforming catalyst development. J. Shihadeh and Di-Jia Liu*, *DoE J. of Undergraduate Research*, Vol 4, P 120-125, (2004)
71. Characterization of kilowatt-scale autothermal reformer for production of hydrogen from heavy hydrocarbons. Di-Jia Liu*, T. Kaun, H. K. Liao and S. Ahmed. *Int. J. of Hydrogen Energy* 29/10 pp. 1035-1046, 2004.
72. Structure and Chemical Properties of Pt Nitrate and Application in Three-Way Automotive Emission Catalysts. Danan Dou, Di-Jia Liu and Heinz J. Robota, *Appl. Catal. B, (Environmental)* 30 (1-2), 11 (2001).
73. Two New approaches for CO removal from reformat fuel for the PEM fuel cell applications. Di-Jia Liu*, J. Williams, M. Kaiser, D. Winstead, S. Simpson and T. Rehg, *SAE Trans, Journal of Engines* 2000-01-0379.
74. Two New Approaches For CO Removal From Reformat Fuel For PEM Fuel Cell Application. Di-Jia Liu*, J. Williams, M. Kaiser, D. Winstead, J. Kudart, S. Simpson and T. Rehg, *SAE* 2000-01-0379.
75. On the Mechanism of NO Selective Catalytic Reduction by Hydrocarbons over Cu-ZSM-5 via X-ray Absorption Spectroscopic Study. Di-Jia Liu* and Heinz J. Robota, *J. Phys. Chem.* 103 (14), 2755, (1999).
76. X-Ray Microscopy of Multiphase Polymeric Materials. H. Ade, A. P. Smith, G. R. Zhuang, B. Wood, I. Plotzker, E. Rightor, D. J. Liu, S. C. Lui, C. Sloop, *Mater. Res. Soc. Symp. Proc.* 437, 99 (1996).
77. Structure-function properties in Cu-ZSM-5 NO decomposition and NO SCR catalysis. Karl. C. C. Kharas, Di-Jia Liu and Heinz J. Robota, *Catal. Today* 26(2), 129 (1995).
78. X-ray Absorption Spectroscopic Study of Cu in Cu-ZSM-5 During NO Catalytic Decomposition. Di-Jia Liu* and Heinz J. Robota, Chapter 12, 147, *Reduction of Nitrogen*

Oxide Emission, U. S. Ozkan, S. K. Agarwal and G. Marcelin, eds. ACS Book Symposium Series 587, (1994).

79. *In situ* Characterization of Cu-ZSM-5 by X-ray Absorption Spectroscopy: XANES study of Cu Oxidation State in Cu-ZSM-5 during the Selective Catalytic Reduction of NO by Hydrocarbons. Di-Jia Liu* and Heinz J. Robota, *Appl. Catal. B; (Environmental)* **4** 155, **1994**.
80. *In situ* Characterization of Cu-ZSM-5 by X-ray absorption Spectroscopy: XANES study of Cu during NO Decomposition. Di-Jia Liu* and Heinz J. Robota, *Catal. Lett.* **21**, 291 (1993).
81. Deactivation in Cu-ZSM-5 Lean Burn Catalysts. K. C. C. Kharas, H. J. Robota and D. J. Liu, *Appl. Catal. B*: **2**, 225 (1993).
82. Crossed-Beam Studies of Radical Reaction Dynamics: $CN + O_2 \rightarrow NCO (X^2\Pi) + O^*$. R. G. Macdonald, D. M. Sonnenfroh, D.-J. Liu and K. Liu. *Can. J. Chem.* **72**, 660 (1994).
83. Dynamics of H_2 Elimination from Cyclohexadiene. E. F. Cromwell, D.-J. Liu, M. Vrakking, A. H. Kung and Y. T. Lee, *J. Chem. Phys.* **95**, 297 (1991).
84. Dynamics of H_2 Elimination from 1,4-Cyclohexadiene. E. F. Cromwell, D.-J. Liu, M. Vrakking, A. H. Kung and Y. T. Lee, *J. Chem. Phys.* **92**, 3230 (1990).
85. The $\nu_2 1^- \leftarrow 0^+$ Band of $H_3^{18}O^+$. Nathan N. Haese, Di-Jia Liu and Takeshi Oka, *J. Mol. Spectrosc.* **130**, 262 (1988).
86. The ν_3 Fundamental Band of $HCNH^+$ and the $2\nu_3 \leftarrow \nu_3$ and $\nu_2 + \nu_3 \leftarrow \nu_2$ Hot Bands of HCO^+ . Di-Jia Liu, Sze-Tsen Lee and Takeshi Oka, *J. Mol. Spectrosc.* **128**, 236 (1988).
87. Infrared Spectroscopy of Carbo-Ions. IV. The $A^2\Pi_u \leftarrow X^2\Sigma_g^+$ Electronic Transition of C_2^- . B. D. Rehfuss, D.-J. Liu, B. M. Dinelli, M.-F. Jagod, W.-C. Ho, M. Crofton and T. Oka, *J. Chem. Phys.* **89**(1), 129 (1988).
88. The Infrared ν_5 Band (HNC Bend) of Protonated Hydrogen Cyanide, $HCNH^+$. W.-C. Ho, C. E. Blom, D.-J. Liu and T. Oka, *J. Mol. Spectrosc.* **123**, 251 (1987).
89. Rotational Spectroscopy of Molecular Ion Using Tunable Diode Lasers. Di-Jia Liu, Wing C. Ho and Takeshi Oka, *J. Chem. Phys.* **87**(5), 2442 (1987).
90. Observation of the Rotational Spectrum of OH. Di-Jia Liu and Takeshi Oka, *J. Chem. Phys.* **84**(4), 2426 (1986).
91. The Calculated ν_2 (inversion) Spectrum of H_3O^+ . Di-Jia Liu, Takeshi Oka and Trevor J. Sears, *J. Chem. Phys.* **84**(3), 1312 (1986).
92. Infrared Spectrum of the ν_2 Vibration-Inversion Band of H_3O^+ . Di-Jia Liu, Nathan N. Haese and Takeshi Oka, *J. Chem. Phys.* **82**(12), 5368 (1985).
93. Experimental Determination of the Ground-State Inversion Splitting in H_3O^+ . Di-Jia Liu and Takeshi Oka, *Phys. Rev. Lett.* **54**(16), 1787 (1985).
94. The Infrared Spectrum of KH. Nathan N. Haese, Di-Jia Liu and Robert S. Altman, *J. Chem. Phys.* **81**(9), 3766 (1984).

MAJOR CONFERENCE PRECEEDINGS

1. “MOFs and POPs and more – new classes of highly efficient non-PGM and ultralow PGM fuel cell catalysts prepared from rationally designed porous precursors”, Heather Barkholtz, Lina Chong, Zach Kaiser, Di-Jia Liu, Conference proceeding for TechConnect World Innovation Conference, May 22-25, **2016**, Washington, DC.
2. “Non-precious metal oxygen reduction catalysis in fuel cell: rational design from catalyst to electrode” Preprint for 252th ACS National Meeting, August 21-25, **2016**, Philadelphia, PA
3. “Non-Precious Metal Fuel Cell Catalysts Prepared By Rationally Designed Porous Materials” Heather Barkholtz, Lina Chong, Dan Zhao, Di-Jia Liu, Conference paper for 5th European Fuel Cell Forum, Lucerne, Switzerland, **2015**
4. “ORR In Fuel Cell & Li-Air Battery: From Catalyst Design To Mechanistic Study” D.-J. LIU, Extended abstract at International Conference on Electrochemical Energy Science and Technology (EEST2015), Vancouver, Canada, Aug. 16 - 22, **2015**
5. “Self-Propagating Catalysis – On the Comparison of ORR/OER Mechanism in Li-O₂ Battery with Fuel Cell” Extended Abstract for 227th ECS Spring Meeting, Chicago, IL, May 24 – 28, **2015**
6. “Highly Active Non-PGM Catalysts Prepared from Metal-Organic Frameworks” Heather M. Barkholtz, Zachary Kaiser, Di-Jia Liu, Extended Abstract for 227th ECS Spring Meeting, Chicago, IL, May 24 – 28, **2015**
7. “A Versatile Preparation of Highly Active ZIF-based Non-PGM Catalysts through Solid State Synthesis” Dan Zhao, Jiang-Lan Shui, Lauren R. Grabstanowicz, and Di-Jia Liu” Extended Abstract of 226th ECS Meeting, **2014**.
8. Spatiotemporal Operando Investigation on Chemical Processes in Lithium-oxygen Battery Jianglan Shui, John Okasinski, Peter Kenesei, Jon Almer and Di-Jia Liu, 6th International Conference on Advanced Lithium Batteries for Automobile Applications, **2013**.
9. New Approach to High-Efficiency Non-PGM Catalysts Using Rationally Designed Porous Organic Polymers, Shengwen Yuan, Jianglan Shui, Lauren Grabstanowicz, Chen Chen, Sean Commet, Briana Repogle and Di-Jia Liu, Extended Abstract of 224nd ECS Meeting **2013**.
10. Holistic View on Chemical Processes in Li-O₂ Battery Based on Operando Spatiotemporal Investigation. Jianglan Shui, John Okasinski, Peter Kenesei, Jon Almer and Di-Jia Liu, Extended Abstract of 224nd ECS Meeting, **2013**.
11. Understanding of Electrolyte Stability and Its Impact to Lifespan of Li-O₂ Battery, Jianglan Shui, John Okasinski, Dan Zhao, Jon Almer and Di-Jia Liu, Extended Abstract of 222nd ECS Meeting, **2012**.
12. Low-Cost, High-Efficiency Non-PGM Cathode Catalysts Using MOFs as Precursors, Dan Zhao, Jianglan Shui, Chen Chen, Sean Comment, Briana Repogle and Di-Jia Liu, Extended Abstract of 222nd ECS Meeting, **2012**

13. Investigation of deactivation mechanism in Li-air battery using a synchrotron microfocus x-ray diffraction technique, Jianglan Shui, John Okasinski, Jon Almer and Di-Jia Liu, *Prepr. Pap.-Am. Chem. Soc., Div. Energy Fuels Chem.* **2012**, 57(2), 306
14. Exploring applications of nanomaterials for fuel cell & hydrogen storage, Di-Jia Liu, Shengwen Yuan, Gabriel Goenaga, Junbing Yang, Desiree White and Alex Mason, *Prepr. Pap.-Am. Chem. Soc., Div. Fuel Chem.* **2011**, 56 (1), 393
15. New Approaches To Non-Pgm Electrocatalysts Using Porous Framework Materials, G. Goenaga, S. Ma, S. Yuan, A. Mason, D.-J. Liu, Extended Abstract of 218th ECS Meeting, Las Vegas, NV, October 10-15 **2010**
16. Porous Organic Polymers (POPs) for Hydrogen Storage, D.-J. Liu, et. al. Extended Abstract, 1st International Conference on Materials for Energy, Karlsruhe, Germany, July 5, **2010**
17. Novel Approaches to Electrode Catalysts for Oxygen Reduction Reaction, D.-J. Liu, et. al. Extended Abstract, 1st International Conference on Materials for Energy, Karlsruhe, Germany, July 5, **2010**
18. Investigation of phase and strain distributions from Cr poisoning inside of solid oxide fuel cell using a microfocused X-ray method, D.-J. Liu, et. al. Extended Abstract, 1st International Conference on Materials for Energy, Karlsruhe, Germany, July 5, **2010**
19. New Approaches to Non-PGM Catalysts through Rational Design, D.-J. Liu, S. Yuan, S. Ma, G. Goenaga, A. Mason, Extended Abstract of Fuel Cell Seminar & Exposition, San Antonio, TX, October 18-21, **2010**
20. Polymer Electrolyte Membrane Fuel Cell with Vertically Aligned Carbon Nanotube Electrode, Di-Jia Liu, Junbing Yang, Gabriel Goenaga, Ann Call, in *Nanotubes, Nanowires, Nanobelts and Nanocoils—Promise, Expectations and Status*, edited by P. Bandaru, S. Grego, I. Kinloch (Mater. Res. Soc. Symp. Proc. Vol. 1142, Warrendale, PA, **2009**, Paper #: 1142-JJ20-08, DOI: 10.1557/PROC-1142-JJ20-08
21. High-Energy X-Ray Measurements of Layered Systems for Energy Applications, J.D Almer, D.J. Liu, B.J. Harder, C.M. Weyant, Proceedings of the 29th Risoe Symposium on Materials Science: Energy Material, **2008**, p 207-214.
22. "Performance Improvement in PEMFC Using Aligned Carbon Nanotubes as Electrode Catalyst Support" Extended Abstract of the 214th Electrochemical Society Meeting, Honolulu, HI, October 12-17, **2008**
23. "Probing Dynamics of Catalytic Structure at Nanosecond Time Domain using a LITR-XAS Approach" D. J. Liu, X. Zhang, E. Wasinger, K. Attenkofer, G. Jennings, and L. X. Chen, Extended Abstract of 20th North American Catalysis Conference, Houston, TX, June 17-22, **2007**
24. "Functionalized Aligned Carbon Nanotubes as Pt-free Electrocatalyst with Novel nanoarchitecture for PEMFC" J. Yang and D. J. Liu, Extended Abstract of the 20th North American Catalysis Conference, Houston, TX, June 17-22, **2007**

25. "Effect of Nitrogen Dopant on the Structure and Electrocatalytic Activity of Aligned Carbon Nanotubes", J. Yang and D. J. Liu, Extended Abstract of 211th Electrochemical Society Meeting, Chicago, IL, May 6-11, **2007**
26. "Characterization of Cr Poisoning in Solid Oxide Fuel Cell Using a Novel Synchrotron Microfocusing X-ray Diffraction Technique" D. J. Liu, J. Almer, T. Cruse and M. Krumpelt, Extended Abstract of 31st International Cocoa Beach Conference & Exposition on Advanced Ceramics and Composites, Daytona Beach, FL, January 21-26, **2007**
27. Synthesis and characterization of carbon nanotubes with catalytic activity towards ORR for Fuel Cell, Junbing Yang and Di-Jia Liu, *Prepr. Pap.-Am. Chem. Soc., Div. Fuel Chem.* **51(2)**, 673-674, **2006**
28. Functionalized Aligned Carbon Nanotubes as Novel Electrode Catalyst Layer for PEM Fuel Cell Application, Junbing Yang, D. J. Gosztola and Di-Jia Liu, *Fuel Cell 2006 Seminar*, Extended Abstract (**2006**).
29. Perovskite Based Catalysts for Diesel Reforming in Solid Oxide Fuel Cell Application, Di-Jia Liu and Mike Krumpelt, *Fuel Cell 2006 Seminar*, Extended Abstract (**2006**)
30. Chromium Reactions and Transport in SOFCs, Michael Krumpelt, Terry A. Cruse, Brian J. Ingram, Di-Jia Liu, *Fuel Cell 2006 Seminar*, Extended Abstract (**2006**)
31. A Novel Electrode Catalyst for Proton Exchange Membrane Fuel Cell using Aligned Carbon Nanotube, Junbing Yang, Di-Jia Liu and Xiaoping Wang, *Fuel Cell 2005 Seminar, Extended Abstract* (**2005**).
32. Investigation of Structure-Property Relationship of Perovskites as Diesel Reforming Catalysts for Solid Oxide Fuel Cell Applications, D.-J. Liu and M. Krumpelt, Extended Abstract of 19th North American Meeting of the North American Catalysis Society, Philadelphia, PA, May 22-27, **2005**
33. Critical Issues in Catalytic Diesel Reforming for Solid Oxide Fuel Cells, Di-Jia Liu, Mike Krumpelt, Hual-Te Chien and Shuh-Haw Sheen, *Proceedings of ASM Materials Conference & Show*. Oct 18-20, (**2004**)
34. Catalyst and fuel mixing for Diesel Reformer in Fuel Cell Auxiliary Power Unit. D.-J. Liu, M. Krumpelt, H.-T. Chien and S.H. Sheen. *Fuel Cell 2004 Seminar, Extended Abstracts*, (**2004**).
35. Catalysis and Mixing Issues in Diesel Reforming. Mike Krumpelt, Di-Jia Liu, and Shuh-Haw Sheen, *Proc. AIChE Spring Meeting*, (2004).
36. Perovskite catalysts for the autothermal reforming of liquid hydrocarbon fuels. Jennifer Mawdsley, Theodore Krause, James Ralph, Janelle Critchfield, Di-Jia Liu, Laura Miller, Hsiu-Kai Liao, John Kopasz, and Shabbir Ahmed, *Fuel Cell 2003 Seminar, Extended Abstracts*, (**2003**).
37. Diesel Reforming in a Kilowatt-Scale Autothermal Reformer with Liquid Injection. D. J. Liu, H. K. Liao, L. Miller and S. Ahmed. *SAE 2003-01-2255*, **2003**.
38. Characterization of kilowatt scale diesel autothermal reformer with surrogate fuels. Di-Jia Liu, Hsiu-Kai Liao, Laura E. Miller and Shabbir Ahmed, *Proc. AIChE Spring Meeting*, (**2003**)

39. Novel CO removal method for PEM fuel cell using an electro-catalytic oxidation approach. D. J. Liu, J. Williams, M. Kaiser, S. Simpson and T. Rehg, *Prep. Am. Chem. Soc. Div. Fuel. Chem.* **46**(2), 669 (2001).
40. New Approaches For CO Removal From Reformate Fuel For PEM Fuel Cell Application. D. J. Liu, J. Williams, M. Kaiser, D. Winstead, S. Simpson and T. Rehg, *Fuel Cell 2000 Seminar, Extended Abstracts*, 102 (2000).
41. On the Mechanism of NO Decomposition and Selective Catalytic Reduction by Hydrocarbons over Cu-ZSM-5. Di-Jia Liu, *Prep. Am. Chem. Soc. Div. Fuel. Chem.* **40**(4), 1060 (1995).
42. Deactivation of Pt-ZSM-5 for selective reduction of NO. K. C. C. Kharas, H. J. Robota, D. J. Liu and A. K. Datye, *Prep. Am. Chem. Soc. Div. Fuel. Chem.* **40**(4), 1068 (1995).
43. *In situ* XANES Characterization of Cu in Cu-ZSM-5 during the Selective Catalytic Reduction of NO by Hydrocarbons. Di-Jia Liu and Heinz J. Robota, *Prep. Am. Chem. Soc. Div. Petro. Chem.* **39**(1), 107 (1994).
44. *In situ* EXAFS and XANES Characterization of Cu in Cu-ZSM-5 during NO Decomposition Catalysis. Di-Jia Liu and Heinz J. Robota, *Prep. Am. Chem. Soc. Div. Petro. Chem.* **39**(1), 175 (1994).
45. Characterizing an Operating Catalyst; Oscillatory Oxidation of CO over Pt/Al₂O₃. Heinz J. Robota, Di-Jia Liu and Ken Finkelstein, *Prep. Am. Chem. Soc. Div. Petro. Chem.* **38**(4), 811 (1993).
46. *In situ* Characterization of Cu-ZSM-5 by X-ray absorption Spectroscopy: XANES study of Cu during NO Decomposition. Di-Jia Liu and Heinz J. Robota, *Prep. Am. Chem. Soc. Div. Petro. Chem.* **38**(4), 742 (1993).

ISSUED PATENTS & PENDING APPLICATIONS

Electrolysis, Fuel Cell & H₂ Technologies

1. An electro-catalytic oxidation (ECO) device to remove CO from reformate for fuel cell application. **US Patent 6,245,214**
2. Removing CO from reformate for fuel cell application using a regenerable CO adsorption/catalytic oxidation bed (ACO) device. **WO 01/83365**
3. Regeneration methods to remove carbon monoxide from reformate fuel using an adsorption/electro-catalytic oxidation (ECO) approach. **US Patent Application 20010037948**
4. A carbon monoxide removal device for proton exchange membrane fuel cell application using a hybrid adsorption and selective catalytic oxidation approach. **WO 09/563,220**
5. Multiple layer electrode for improved performance. **US Patent Application 20020068213**
6. Solid oxide fuel cell with internal reforming, catalyzed interconnect for use therewith, and methods. **US Patent 7,732,084**

7. Autothermal reforming catalyst with perovskite-type structure. **US Patent 7,507,690**
8. Method of fabricating electrode catalyst layers with directionally oriented carbon support for proton exchange membrane fuel cells, **US Patent 7,758,921**
9. Aligned carbon nanotube with electro-catalytic activity for oxygen reduction reaction. **US Patent 7767616**
10. Electro-catalytic oxidation device for removing carbon from a fuel reformat. **US Patent 7,666,534**
11. Porous polymeric materials for hydrogen storage. **US Patent 8076382**
12. Method of fabricating electrode catalyst layers with directionally oriented carbon support for proton exchange membrane fuel cell, **US Patent 8,137,858**
13. Electrocatalysts using porous polymers and method of preparation. **US Patent 9012344.**
14. Non-platinum group metal electrocatalysts using metal organic framework materials and method of preparation, **US Patent 8,835,343**
15. Catalytic Membranes for Fuel Cells, **US Patent 7,927,748**
16. Cathode Catalyst for Li-Air Battery with Ultra Low Metal Content, **ANL-IN-10-108**
17. Synthesis of electrocatalysts using metal-organic framework materials, **US Patent Application 20130273461**, filed April, 2012.
18. Nanofibrous electrocatalysts, **US Patent 9,350,026.**
19. Porous polymeric materials for hydrogen storage, **US Patent 8,410,185**
20. Electrocatalysts using porous polymers and method of preparation. **US Patent 9,406,943**
21. Non-platinum group metal electrocatalysts using metal organic framework materials and method of preparation, **Divisional of US Patent Application**
22. Low platinum catalyst and method of preparation, **US Patent 9,825,308**
23. Nanofiber electrocatalysts, **ANL-IN-17-002**
24. Carbon dioxide reduction electro catalysts prepared for metal organic frameworks, **ANL-IN-17-028.**
25. Carbon supported single atom carbon dioxide reduction electro catalysts **ANL-IN-17-147**
26. Prussian Blue Analogue-Derived Catalysts for PEM Electrolyzer, **ANL-IN-18-068**

Distributive Power Generation

27. Emissions Control in a Recuperated Gas Turbine Engine. **US Patent 6,584,760**
28. Method of preparing a catalyst layer over a metallic surface of a recuperator. **US Patent 6,540,843**

Environmental Catalysis

29. Environmental control system including ozone destroying catalytic converter having anodized and washcoat layer. **US Patent 6,576,199**

30. Tubular catalytic aircraft precooler. **US Patent 6,962,193**
31. Combined hydrocarbon/ozone converter for airplane bleed air system. **US Patent Application 20040175313**
32. Environmental control system including ozone destroying catalytic converter having anodized and washcoat layer. **US Patent 7,037,878**
33. Environmental control system including ozone-destroying catalytic converter having anodized and washcoat layers. **US Patent 7,604,779**

Sensor

34. Catalytic adsorption and oxidation based carbon monoxide sensor and detection method. **US Patent 6,550,310**
